A tailored solution to meet the needs of the even most demanding production environments

The digital press you choose should offer certain threshold capabilities to ensure success: quality comparable to offset, high reliability for long runs, generous paper capacity, expansive media support and ease of use. Get all this and more with the RICOH Pro C9200/C9210 Color Sheet-Fed Printers. Commercial printers, service bureaus and enterprise in-plant operations can migrate offset jobs to digital confidently, expand offerings and pursue new applications. You'll maximize your profitability and return on investment (ROI) by:

• Delivering consistent, repeatable, superb color and image quality

• Producing long runs efficiently and cost effectively

• Developing new, high-margin applications using diverse sizes and types of media

• Maximizing uptime and asset utilization with advanced automation and usability

• Being prepared for changing market conditions and customer requirements

Achieve your digital objectives faster, better and with innovation

1 Saddle stitch booklet finishing and 100-sheet stapling are done with the SR5060 Booklet Finisher. Additional commercial finishing options are also available.

2 Keep jobs running continually with the High Capacity Stacker SK5040. Up to 5,000 sheets can be stacked and moved with the Roll Away Cart. Up to two Stackers can be configured in one system.

3 Diagnose color automatically. An in-line sensor ensures real-time color adjustment and correction during printing.

4 Maintain image gradation quality. The Image Calibration System scans image density to make any necessary corrections prior to printing.

5 Register images front to back automatically. An in-line sensor provides the data used by the system to adjust image position and shape.

6 **Expand your offerings with oversize printing.** Oversize sheet printing capabilities allow you to print up to 49.6" simplex and 40.5" duplex.

7 **Increase operator productivity.** Each operator can customize the new 17" Smart Operation Panel, which displays the entire device configuration.

8 **Expedite media selection.** The enhanced graphical Media Library lets you easily create paper settings and select desired papers.

9 **Deliver superb quality.** VCSEL laser beam technology and 2400 x 4800 dpi print laser resolution provide output that compares favorably with offset.

10 **Vacuum Feed Trays ensure the paper feeding ability of Coated Media up to 470 gsm maximum.** Up to 3 Units can be added to increase the feeding capacity to 18,100 sheets.

Set up jobs fast and accurately. Using the new Media Management Tool, operators can share the media catalog among multiple Pro C9200/C9210 digital presses (not shown).

# Keep up with changing marketplace and customer requirements

Choose a digital solution that supports your growth and agility

You never know when market conditions or customer requirements might change. Prepare for the future and protect your investment with the Pro C9200/C9210, which enables you to manage information with the utmost agility. Take advantage of powerful variable data processing (VDP) capabilities to personalize, version and otherwise customize materials. Build on basic color management capabilities with industry standards, calibration methods and G7 certification. Increase efficiency and accuracy with the RICOH TotalFlow Suite of software, which automates and streamlines tasks related to makeready, ticketing, scheduling, creating workflows, reporting and more. With a flexible, scalable digital print solution that allows you to connect up to 15 sheet-fed printers, you can pursue ambitious growth plans.

Count on exceptional reliability for long uninterrupted runs

Our printers are designed to maintain their rated speeds of 115 and 135 pages per minute, regardless of paper weight up to 470 gsm. The data transfer unit delivers high transfer speeds with real-time, bidirectional image data transfer between the Pro C9200/C9210 mainframes and controllers. Data transfer capacity is increased to support oversize sheet materials up to 49.6". New swing-and-shift technology reads a paper side edge instead of the leading edge to achieve registration accuracy with paper of varying sizes. An in-line sensor scans each sheet, including image length, before and during printing. With many variables controlled automatically, long runs are simple and straightforward.

Thrive now and in the future with the right vendor partner

You work hard to ensure your success and profitability, and so do we. Our consultants can assess your business, your marketplace and opportunities before giving you objective recommendations based on decades of experience and insights into industry trends. In virtually any environment, our professional services team can customize and integrate your digital print solution. Technical support up to 24x7 is just a click or call away when you need it. A nationwide parts network assures ready availability of spares to support our technicians and the TCRU program. RICOH @Remote can help maximize uptime with remote diagnosis, software upgrades and more. With people, processes and technology backing you up, you can feel confident that your investment and your future are in good hands.
